PREFACE

H. M. Umberto II, the last King of Italy, is part of a great family tradition in numismatics. His father, Victor Emmanuel III, who reigned as King of Italy for nearly a half-century (1900-46), was an ardent collector who spent much of his free time studying his coins and medals. It was Victor Emmanuel III who was chiefly responsible for the execution of "Corpus Nummorum Italicorum," the standard 20-volume work on Italian coins which was originally published at Rome between 1910-40.

The turbulent, dramatic and complicated history of Italy is clearly reflected in its coinage. Italian coinage is an extremely complex topic since most of the issues through the better part of the nineteenth century are local or regional . . . moreover, Italian coinage has been issued by successive conquerors, by independent city republics, great ruling houses, and by papal authority. Despite all this, however, the vast Italian series is still one of the most carefully researched of all largely because of the efforts of Victor Emmanuel III.

It was Victor Emmanuel who launched the project that consumed more than a generation of time . . . it must be emphasized here that the king himself did a great deal of the detailed research work. Nineteen ponderous volumes were produced during his lifetime, with the twentieth (on the Coinage of Naples from Philip II to the Closure of the Mint) being published after his death. The entire twenty volume series, containing more than 11,000 pages, was recently reprinted.

Umberto worked actively with his father in researching "Corpus Nummorum Italicorum," particularly those sections dealing with the coinage of the House of Savoy. Interestingly enough, Hans Schulman's father, Max, assisted Victor Emmanuel in researching specialized areas throughout the twenty-volume work.

Umberto II ruled as Regent of Italy in 1944-46 during his father's final two years on the throne, and then was King in his own right for the brief period between May 9-June 13, 1946. Since that time he has lived in exile and now resides at his "Villa Italia" in Cascais, a short distance from Estoril, Portugal's fabulous seaside resort town fifteen miles from Lisbon.

Umberto, who has taken a deep interest in numismatics since boyhood when he shared his father's enthusiasm for coins and medals and learned at his side, has played an active role in the international numismatic scene in recent years. In the spring of 1971, for example, he took part at various functions at the annual convention of the International Association of Professional Numismatists held at Estoril in that year. In fact, he had IAPN members as his guests at a lavish reception and cocktail party given at the Villa Italia.

ANCIENT PERSIA

IMMENSELY RARE GOLD ANIMAL

2 This beautiful artistic gold animal (an IBEX wild goat) came from the Sultan Abdul Hamid II of Turkey collection. It has been discovered by different scholars as Pre–achaemenid, Luristan and other mostly Persian cultures. In the course of many years certain doubts have been expressed, This and a few others have been traced back to the collection of Mr. Melvin Guttman, who died several years ago and who was considered an authority on gold objects, and could discern authenticity. Many of these objects were classified in the Oberlin Art Catalogue and have found their way into the Museums all over the world. This animal forms part of an estate of coins and related objects. In the period (after 1200 BC.) there is little distinction between a gold object and money — It was therefore included in a collection of a famous numismatist. 45mm x 48mm. **Magnificent IBEX**–running, his horns bent. Weight 12 grams. Extr. Fine, some coloring from cleaning earth from the object. **PHOTO** ($2,000.–2,750.)

3 600 BC, A Deity, Half King and half lion winged; most unusual thin gold ornament used by the Achaemenids as trading "coin". Pure gold. As found in North Persia. Unc. This is the last specimen of a hoard from which all other items have been sold; a similar lot sold for $290.– some time ago. **PHOTO** ($300.–350.)

4 Small winged Ram. 40mm high, between legs 20mm. weight:—10.6 grams. An adorable gem in gold of the highly artistic Pre–Achaemenid Art. Ram looking forward; horns curved back–used in trading since coin did not exist. Melvin Guttman collection. Some coloring from cleaning earth off, found in Iran. Gem Unc. **PHOTO** ($1,250.–1,350.)

9 From the consignor. Gold coinlike ornaments supposed to imitate the ancient Greeks–designs like the tripod of Croton or the Cyzicus incuse—very attractively made for jewelry purposes – weight 14 grams for the 2 pieces. Extr. F. 2 pieces. **PHOTO** ($400.–500.)

SILVER PLATES

1971 FRANKLIN MINT CHRISTMAS PLATE "UNDER THE MISTLETOE"

By NORMAN ROCKWELL

ARTIST AND DESIGN—This is the second annual Christmas plate produced by The Franklin Mint. Like the first Franklin Mint Christmas Plate, which was issued in 1970, this plate was designed by Norman Rockwell, the most famous American artist of our time, and is part of a continuing series. Rockwell's original work of art for the 1971 Christmas Plate called "Under the Mistletoe." With typical Rockwellian insight, however, the artist has chosen to place an elderly couple—rather than two starry-eyed youngsters—beneath the mistletoe. That's appropriate. For as one expert critic of Rockwell's work has pointed out, Rockwell people are "real people . . . who have kept alive in their hearts the hope of a constantly improving world."

360 The Rockwell plate attractively packaged was issued for $100.– 8″ diameter Sterling silver, edge, 24,792 issued. Hallmarked. **PHOTO** Valued by us ($350.–450.)

THE FIRST FRANKLIN MINT BIRD PLATE: "THE CARDINAL"

By RICHARD EVANS YOUNGER

ARTIST AND DESIGN—"The Cardinal" is the first in a series of four collector's plates featuring original art by Richard Evans Younger, the distinguished American wildlife artist. Since the days of John James Audubon, one of the most cherished forms of collector's art has been authentic bird studies.

FEATURES—Each "Cardinal" plate was individually etched in solid sterling silver, and each is serially numbered. The serial number appears on a silver medallion permanently attached to the back of each plate. Each plate measures 8″ in diameter. This plate design represents Mr. Younger's first work to be etched in sterling silver.

361 The Bird plate was issued in Sterling silver. 8″ diameter etched. Issued at $125.– 13,939 issued, serially numbered. Beautifully packaged. Should bring **PHOTO** ($300.–400.)

THE MEDAL SECTION

MEDALS GRAPHICALLY RELATE HISTORY

The numismatist will find that the medals listed in this catalogue relate numerous aspects of European history in a very dramatic fashion. Moreover, we ought to bear in mind that a medalist can generally exercise greater flexi–

bility in designing a medal than he could in executing a coin design. No one appreciate coins more than the author of this brief essay, but we know that engravers of coins must follow stringent rules . . . for example, we won't see high relief coins because circulating coins must be "stacked" while medals do not need to be. Thus, true high relief designs are peculiar to medals and not to coins.

Additionally, a medal need not be limited in size as a coin must be. We'll see medals here measuring 60, 70, 80 and more millimeters in diameter. Consequently, with a greater surface to work on, the medalist can take on complicated designs, designs he knows could not be rendered on smaller coins.

The collection of World War I medals being offered here is particularly significant with issues of both the Central Powers and the Allies being included. Many of the German medals cite victories on both land and sea, while some are of a satirical nature . . . e. g. those pertaining to U. S. President Woodrow Wilson. The French medals commemorate various Allied victories . . . and others depict grieving parents, rows of crosses at military cemeteries, medals awarded to wives of fallen soldiers, etc. Also highlighted in the sale are medals commemorating the Versailles Peace Conference, as well as later peace conference held in Geneva.

Students of the Victorian era will be interested in the medals described in the following pages. Numerous events connected with Queen Victoria's record 64–year reign are recorded on a wide array of medals: her coronation in 1837, her marriage to Prince Albert in 1840, the opening of the famous Crystal Palace Exhibition in London in 1851, her 1887 and 1897 Jubilees, and her death in 1901.

A medal ranks as a true work of art when it portrays a human event so sharply and vividly that it stirs the emotions of all who look at it, even for a fleeting few seconds . . . by Robert Obojski.

THE MAJOR CANN COLLECTION OF ANTIQUE JADES AND ANTIQUITIES

This is the second half of the Cann Collection. The first 123 lots were sold in the March 1972 jade sale and the catalogue from that sale should be referred to in discerning explanations for the multitudinous symbols used by the jade carver. The items listed herein have been accumulated over many years and could not today be duplicated for the estimated value. In fact, the last year and a half has seen a price rise on the oriental retail jade markets of almost 400%. The merchants seem to speak rather intuitively when they say "You can't go wrong in buying jade at any price." Much to my regret, I ignored this helpful advice in 1967 when I was offered twelve Archers rings for less than $200. Today it would take that much to buy just one—if you can find that one.

I have used the estimated price listing in two ways: first, it is a conservative indicator to the retail value of the pieces as sold in the U. S. which in most cases corresponds fairly well to those in the Orient. Price rises are always felt first at the source which means at any given time the prices which are rapidly rising in the Orient just about equal those for the same type of item being sold in the U. S. with profit and shipping added; second, the estimates are excellent guides to the relative merits of aesthetics, color, use, quality of workmanship, history, and that unknown quantity, desirability.

I have endeavored to collect high quality affordable types of carvings which are both interesting and decorative, and whether you are just beginning, or a professional in this the oldest commodity of collectibles, you should find something in this group which will speak to you of Emperors, Gods and the mysticism of 27 centuries.

Contrary to our first jade catalogue—which by the way is out of print—we have followed the listing more by type, than by dynasty. We still have kept the dynasty attribution, which has been verified among 5 experts— as you know, dynasty attribution is one of the most difficult things in jades—but jades as we offere here will never again be offered—and never for prices they will reach today.

1696 This is a very interesting piece, as it is made from glass and not jade. While it is probably a recent attempt to make money, it is illustrative of a prevalent form of burial substitution which has been common in many tomb finds over the years where families either too poor or too "attached" would substitute glass items for the normal burial items. Recent glass "spinner" or "prayer wheel" which has been carved from single piece of glass. While holding the center one may rotate the outer diameter around it, purportedly saying a prayer with each revoltion. This is cruder but similar in design to lot #9 in the March sale. 55 x 6mm. 3. The highest bidder shall be the buyer and if any dispute arises between buyers, the lot may be put up & sold again. No lots are sold out of their numerical order nor can lots be broken up.
4. No commissions will be charged for executing bids, but postage and insurance will be added to the invoice. Lots delivered in N. Y. State are subject to the applicable salestax, while Lots delivered in N. Y. City are subject to 7% salestax.
5. AUCTION SALES ARE STRICTLY FOR CASH AND MUST BE PAID IMMEDIATELY IN U. S. FUNDS. Personal checks acceptable after proper identification. In the auction room, upon the successful bid, the buyer will give his name & address and shall pay the full price plus taxes before leaving the premises, or when he picks up his lots, which must be done before December 21.

Third parties refusing to accept coins from the agent are entirely the responsibility of the agent. The auctioneers cannot accept returns from agents because of third parties for any reason whatsoever unless coins were brought with specific special arrangements between the agent and the auctioneers.
